

Experiment title: Cambridge MRC Block Allocation Group
Importin-beta – FxFG nucleoporin complex

Experiment number:
LS1669

Beamline: ID14-2	Date of experiment: from: 05 Mar 00 to: 07 Mar 00	Date of report: 27/8/00
Shifts: 1	Local contact(s): Ed Mitchell	<i>Received at ESRF:</i>

Names and affiliations of applicants (* indicates experimentalists):

Dr Murray Stewart,* (principal investigator)

Mr Richard Bayliss, * (graduate student)

MRC Laboratory of Molecular Biology, Hills Road, Cambridge CB2 2QH, UK

Report:

Collected two partial data sets on P212121 crystals of an importin-beta – FxFG nucleoporin complex using STRATEGY option. Fault in local program gave incorrect angle ranges and so data sets were only 70% complete. Data collection was repeated successfully on April 21.
