

COBALT COMPLEXING ABILITY OF HYDROSOLUBLE POLYAMIDOAMINES USED AS NON-VIRAL VECTORS FOR INTRACYTOPLASMIC DELIVERY

Luigi Falciola, Paolo Ferruti, Beatrice Malgesini, Nadia Missaglia, Patrizia Mussini, Elisabetta Ranucci, Manuela Rossi

Due to problems with the monochromator, it was impossible to record the EXAFS spectra of our samples in this session, and the experiment was rescheduled.

For details on the experiment, see the report of the rescheduled session.

Experiment n. 08 01 633
