

STANDARD EXPERIMENT

CONFIDENTIAL REPORT

Experiment title: Defying Decomposition using Simultaneous Fast Scanning Calorimetry and micro-XRD: Effect of the Halide Anion on The High-Temperature Properties of Tetraethylammonium Salts	Experiment number: CH-6488
Main-Proposer : Aart Van den Bruinhorst	
Beamline and dates of experiment : ID13, 27/10/2022 to 30/10/2022	

A confidential report was submitted for this experiment; it was sent to the User Office on 10/03/2023.
