

**Experiment title:**

Structural Determination of Bacteriorhodopsin Intermediates

**Experiment
number:
LS-1621**

Beamline:	Date of experiment: 18 June 2000 / 20 June 2000	Date of report:
Shifts:	Local contact(s): Christian Riekkel	<i>Received at ESRF:</i>

Names and affiliations of applicants (* indicates experimentalists):

Harmut Luecke - University of California, Irvine

Anja Rosengarth - University of California, Irvine

Brigitte Schobert - University of California, Irvine

Report:**18 June 2000 / 20 June 2000:**

Due to malfunctioning software/hardware that controls the aperture on beamline ID13, we were unable to collect ANY data on the dates shown above. In the 24 hours we had allocated for our experiments, **no** data collection was performed. This hardware/software failure prevented us from aligning the crystal to the beam.
