

Experiment Report Form

The double page inside this form is to be filled in by all users or groups of users who have had access to beam time for measurements at the ESRF.

Once completed, the report should be submitted electronically to the User Office using the **Electronic Report Submission Application:**

<http://193.49.43.2:8080/smis/servlet/UserUtils?start>

Reports supporting requests for additional beam time

Reports can now be submitted independently of new proposals – it is necessary simply to indicate the number of the report(s) supporting a new proposal on the proposal form.

The Review Committees reserve the right to reject new proposals from groups who have not reported on the use of beam time allocated previously.

Reports on experiments relating to long term projects

Proposers awarded beam time for a long term project are required to submit an interim report at the end of each year, irrespective of the number of shifts of beam time they have used.

Published papers

All users must give proper credit to ESRF staff members and proper mention to ESRF facilities which were essential for the results described in any ensuing publication. Further, they are obliged to send to the Joint ESRF/ ILL library the complete reference and the abstract of all papers appearing in print, and resulting from the use of the ESRF.

Should you wish to make more general comments on the experiment, please note them on the User Evaluation Form, and send both the Report and the Evaluation Form to the User Office.

Deadlines for submission of Experimental Reports

- 1st March for experiments carried out up until June of the previous year;
- 1st September for experiments carried out up until January of the same year.

Instructions for preparing your Report

- fill in a separate form for each project or series of measurements.
- type your report, in English.
- include the reference number of the proposal to which the report refers.
- make sure that the text, tables and figures fit into the space available.
- if your work is published or is in press, you may prefer to paste in the abstract, and add full reference details. If the abstract is in a language other than English, please include an English translation.

**Experiment title:**

High energy diffraction of zeolite building units

Experiment**number:**

26-01-270

Beamline:

BM1B

Date of experiment:

from: 13-december-06 to: 14-december-06

Date of report:

01-04-08

Shifts:

3

Local contact(s):

Mr Hermann EMERICH

Swiss norwegian beamline, ESRF, Grenoble, France

Report:

Beam time was allocated to us in september 2006. Due to a small human error the wrong beamline was allocated to us. This way we where not able to go and measure the proposed samples at ESRF. During the following time allocation period, new beamtime on BM01 B was allocated to us. This beamtime had the code 26 02 364. As a compensation, the in this report mentioned beamtime was allocated to us.

This beamtime was used only to find the best possible startingpoint for our real PDF measurements in 2007.
