

	<b>Experiment title:</b> Electrodeposition of Ni on UHV prepared Si(2x1) and Si(2x1):H	<b>Experiment number:</b> SI 1528
<b>Beamline:</b> <b>ID32</b>	<b>Date of experiment:</b> from: 8 July 2007 to: 25 July 2007	<b>Date of report:</b> 1.10.2015
<b>Shifts:</b> 18	<b>Local contact(s):</b> J. Roy	<i>Received at ESRF:</i>
<b>Names and affiliations of applicants</b> (* indicates experimentalists): <b>Y. Gruender*</b> , <b>J. Roy*</b> European Synchrotron Radiation Facility		

### Report:

**This Experiment could not be carried out, as during this week the beam could only be delivered sporadically (due to vacuum problems in the tunnel) resulting in less than 9 shifts of beamtime. The combination of the UHV preparation, transfer to the beamline and problems with the beam delivery made it impossible to obtain any data.**
