

	Experiment title: allosteric proteins	Experiment number: 30-01-821
Beamline: BM30A	Date of experiment: from: 07/07/2008 to: 08/08/2008	Date of report: 15/07/2008
Shifts: 3	Local contact(s): Adeline ROBIN	<i>Received at ESRF:</i>
Names and affiliations of applicants (* indicates experimentalists): ROBIN Adeline * DUMAS Renaud * LPCV-UMR5168-iRTSV-CEA Grenoble		

Report:

shifts used: 3

Data collection: 3 (2 at the Se edge, 1 at the Br edge)

Comments: 2 data collections will allow the resolution of a new structure of the norcoclaurine methyltransferase (one without ligand, one with one inhibitor molecule).

Troubles: the cryo-flow on the crystal has stopped abruptly during tests of some crystals. We have lost about 20 crystals.
