CXI	enm	ent		е:

XAS study of the effect of cobalt doping on the Li insertion mechanisms in Co-doped ZnO Li-ion battery anodes.

Experiment number:

MA-3171

Main-Proposer:

Gabriele Giuli

Beamline and dates of experiment:

26/10 - 1/11/2016 - 18 shifts on BM08

A confidential report was submitted for this experiment; it was sent to the User Office on 19 September 2017.
