

	<b>Experiment title:</b> Further investigations on Hg speciation in tree barks	<b>Experiment number:</b> <b>EV-294</b>
<b>Beamline:</b> BM30B	<b>Date of experiment:</b> from: 27/6/2018 to: 30/06/2018	<b>Date of report:</b> 20/02/2020
<b>Shifts:</b> 18	<b>Local contact(s):</b> Mauro Rovezzi	<i>Received at ESRF:</i>
<b>Names and affiliations of applicants</b> (* indicates experimentalists): Valentina Rimondi*, Earth Science Dept., University of Firenze Fabrizio Bardelli*, CNR-Nanotec, c/o Department of Physics, University of La Sapienza Francesco Di Benedetto, Earth Science Dept., University of Firenze Pilario Costagliola, Earth Science Dept., University of Firenze Marco Benvenuti, Earth Science Dept., University of Firenze Laura Chiarantini, Earth Science Dept., University of Firenze		

The experiment was originally scheduled at BM16-FAME-UHD. However, during the initial line setup a part of the vacuum line went broken, and could not be replaced. We were moved to BM30B to carry on our experiment. However, after the first spectra acquisition we decided to quit since the high dilution of our samples do not led to satisfactory quality of data. The experiment was rescheduled for December 2018.
