

	Experiment title: CryoEM-BAG France: Structural Biology using Cryo-EM in France.	Experiment number: MX-2261
Beamline: CM01	Date of experiment: from: 12/03/2021 to: 14/02/2021	Date of report: <i>Received at ESRF:</i>
Shifts: 6	Local contact(s): Daouda A. K. Traore	
Names and affiliations of applicants (* indicates experimentalists): Dr. Petya Violinova Krasteva (CBMN UMR 5248, IECB, Université de Bordeaux, ‘Structural Biology of Biofilms’ group, 2 Rue Robert Escarpit, Pessac 33600, FRANCE)		

Report:

Unfortunately no data was collected as the samples, although shipped with Fedex Overnight Express, arrived with days-long delay at the synchrotron and with apparent damage to the shipment dewar: liquid nitrogen leakage, significant external condensation within minutes of refilling with liquid nitrogen, thawing of the sample and loss of ice/single particles for data collection.
